CAREER OBJECTIVE

Motivated BCA Graduate with a good foundation in full stack development, gained through academic and personal projects that provided a solid understanding of web application workflows and data management. As a passionate digital artist and skilled drawer, I bring creativity and imagination to designing easy-to-use and visually engaging user interfaces that enhance the overall user experience. Driven by continuous learning and skill development, I am eager to contribute effectively to innovative projects and grow within a dynamic organization focused on impactful technology solutions.

PROJECTS

NEX-IDE (Web-based CodeEditor)

A cloud-enabled browser-based IDE that allows users to write, edit, and execute code from any device without installing local compilers. The system includes secure user login, enabling users to save and resume their projects anytime. It supports multi-device access across PC and mobile,real-time code execution, file management, and AI-assisted coding support—all through a clean and user-friendly interface. Technologies used: React.js, Node.js, MongoDB, JavaScript

E-Campus Suite

It is a roll based campus management system with admin, faculty, and student dashboards, including login pages, department details, timetable editing, student management, and feedback pages. Technologies: HTML, CSS, JavaScript

Dealzo (Second-Vehicles Marketplace)

Created a full-featured vehicles marketplace with user authentication, admin panel, search and filtering, wishlist, notifications, and chat. Data is stored in browser localStorage, with responsive UI and separate admin/user interfaces. Technologies: HTML, CSS, Vanilla JavaScript
